

THE DAILY BEE. Thursday Morning, May 14.

LOCAL BREVITIES.

Wanted—Fifty ladies for Congress of Nations, to travel. Address immediately, D. S. Gerry, Omaha P. O.

Mr. John E. Weigman's condition still continues to improve, and the doctors now have strong hopes of his ultimate recovery.

The Omaha Glee Club, at Lincoln, Tuesday night, appeared before one of the largest and finest audiences ever assembled in the capital city.

A lot of barbed wire and signal lamps were stolen by tramps Tuesday morning from Mr. John F. Quayle on St. Mary's avenue, near South avenue.

Mr. Shickler is making active preparations for the opening of the Omaha circus next week. He can be seen most any day training his educated pony on Thirteenth street.

While a funeral procession was returning from the cemetery yesterday morning, one of the teams driven by a Mr. Brennan became frightened and ran away, badly damaging the buggy. No one was hurt.

The examination of the young colored man, Albert Green, on a charge of battery, was held before Judge Anderson Tuesday afternoon, and on the testimony of the girl he was bound over in the sum of \$500, which he furnished.

H. E. Gunner, better known as the "Harry" of the Grand Union Tea Co., has accepted a situation as city salesman with the Omaha Flour Co. Harry is to be congratulated upon this substantial recognition of merit by one of the most enterprising firms of the city.

Monday night thieves visited the Emmet house, owned by Mrs. Durgan, near the Rock Island depot. They entered a room occupied by Conductor Templeton, of the Milwaukee, and a brakeman. The former they relieved of a wallet and \$5, the latter of a coat and vest. No clue to the thieves.

We learn that some benevolent ladies of one of the churches in the city have secured from the Lyceum Bureau the renowned Stuart Rogers to appear at Boyd's Opera House in his role of mirth, art, pathos and sentiment, on Monday, May 25th. The receipts are for charities.

Judge Stanberg was called upon for the fifth time yesterday morning by the mother of a boy who had been "insulted" by his employer. The woman was after "satisfaction," and her demands were quite importunate, which led the judge to remark that there ought to be a special court for the complaints of old women and cranks.

The funeral services of Mrs. Minnie Drexel were conducted yesterday morning at St. Philomena cathedral, and were very largely attended. The remains were buried at the cemetery of the Holy Sepulchre, the following gentlemen acting as pall bearers: O. H. Goodrich, R. S. Livesey, Charles Creighton, H. S. Smith, Ed. Crowell and F. B. Lowe.

Complaints are being made by people living in the vicinity of the nail works to the effect that all fish from Qualey's soap factory and two or three slaughter houses in that vicinity is allowed to flow down a small creek that passes there into the heart of the city, creating a stench along the route that is extremely disgusting. Relief is loudly demanded.

For the past week, J. E. House, a civil engineer, has been setting stakes through that block of vacant property south of Leavenworth street, near Twenty-fourth, known as the Marsh estate, a body of land containing twenty-five acres. It is stated by those who know that the youngest heir will be of age in June, therefore is going to divide his land into town lots, with a view to selling it.

The Pioneer Hook and Ladder company held a meeting Tuesday night in police court. Bills to the amount of \$230, covering the expenses of the parade and ball of the 5th, were allowed, and twenty-five honorary badges ordered. Several short speeches were made by members and stories of former times recounted. It is the intention of the members, although the company is disbanded, to keep up the meetings until July, when the city is to pay \$2,000 for the apparatus owned by them. This money is then to be divided among the members. The following officers were unanimously elected to hold until all accounts of the company are finally settled: President and foreman, Chas. Elsher; treasurer, H. Pundt; secretary, E. C. Ryley; trustees, W. J. Kennedy, J. F. Sheoley and Ed. Wittig.

PERSONAL.

Harry C. Robinson, agent for the Sid C. France dramatic company, was in town yesterday.

C. G. Craig, manager of the Charlotte Thompson company, is at the Millard.

Patrick Egan, the well-known land leaser of Lincoln, is in the city, stopping at the Millard.

Mr. A. B. Davenport, of the Millard, is in Chicago in attendance at the annual convention of the hotel men's association.

At the Campfield: George Jay, Randolph, Ia.; Mrs. H. Garrison, Plattsmouth; M. W. Byrson, Grand Island; James Sweet, Newkirk; T. J. Taylor, J. M. Harmon, H. S. Colby, Shelton; William Armstrong, Lincoln; E. K. McMillan, Ord.

George H. Button and wife, Auburn, Neb.; Dr. L. M. Barker, Grand Island; W. H. Little, T. M. Marquet, Lincoln; T. R. Orr, Ponca; James Reed, Nebraska City; T. W. Lowrey, Thomas Catcheran, Lincoln, are at the Millard.

Henry D. Boyden, Grand Island; John H. Roe, Kearney; J. H. Collins, Cheyenne; T. C. Hitchcock, Gibson; Charles Lever, Bowdon, England; H. G. Hand, Cheyenne; H. H. Nicholson, Lincoln; J. N. Dryden, Kearney, are at the Paxton.

At the Metropolitan: A. G. Hastings, Lincoln; W. J. Biles, Alameda; M. J. Toffe, Emerson; A. C. Spandan, Grafton; F. E. Rush, Ponca; H. O. Orman and wife, Blair; A. D. Allen, Rising City; George J. Squires, Grand Island; Henry Stain, McCook, and John S. King, of Hastings, Neb.

State people at the Metropolitan yesterday: D. A. Sears, Oakland; L. Kryger, Lyons; A. A. Harding, Alameda; D. A. Allen, Rising City; B. W. Doyle, Ponca; M. L. Johnson, Oakland; J. K. Adams, Tekamah; J. P. Hymer, Stockville; Bernard Dolan, J. M. K. Martin, Lincoln; J. W. Combs, Rising City; L. L. Johnson, Stromberg; F. L. Hick, Coleridge; J. W. Hitchcock, Hastings; T. R. Leighton, Plattsmouth; R. D. Ashley, Deatur; Mrs. J. Collins, Grand Island; D. M. O'Sullivan, Humphry, C. Davis, Lincoln; A. J. Kenney, Red Cloud; G. W. Culp, Nebraska; Miss A. Stephenson, Miss J. Bartlett, York, and M. Puhler, of Nebraska City, Neb.

THE PORTLAND PARTY.

From Pocatello, Idaho, to Pleasant Valley, Or. gen.

"Soda Springs" and the "American Falls"—Picture of Snake River Valley.

Special Correspondence of The Bee.

ON BOARD THE TRAIN, HUNTINGTON, Ore., May 11.—To write a letter on board a fast moving train, amid the gossip of the jolliest company of business men who ever met together, is not by any means an easy task. Through mountain gorge and canyon, over lower-capped valleys and rushing streams in Idaho, the train sped at a forty-mile gait, bearing the Omaha excursion party to the sea-kissed city of Portland. There is no section of the United States yet seen by the writer that in all the elements of natural beauty and attractiveness of scenery, of foothill and vale, lofty, snow-capped peaks and far-reaching green plateaus, ruffled by rushing, crystal streams, whose pathways, like the track of a serpent, wind in and out among the willows, cottonwoods and flower-brush that fringe their either border, and in green and gay costume present a foreground to the lovely picture, in which the great line of pale-blue mountains loom up grandly in the distance. Surely nature seems to have created this rugged country with a smile, and the smile has crystallized into a landscape!

THIS IS A GRAZING COUNTRY principally, and equal to the best on the continent. As far as eye can reach all is dense save the ash color of the sagebrush. Domestic stock in herds mingle with the timid, liding rabbits, that absolutely infest this region on the lowlands, while deer, antelope and bear are found in abundance in the higher lands, and mountain lions, sheep and the stately elk are seen in numbers among the craggy peaks that tower above and beyond them. Rabbits are a nuisance in Idaho, and men make a business of killing and capturing them for food and the territorial bounty paid for each pair of rabbit's ears.

Let the reader go back for twenty-four hours and take a good look at SODA SPRINGS.

It is impossible to do more than give an outline of the myriad objects of interest that rush and crowd upon the eye as one moves joyously on.

On Friday afternoon, before the tips of the surrounding hills had been made to glow by the gorgeous rays of a setting sun, the train reached the Idaho fountains of beauty and health. At Soda Springs station, on the Oregon Short Line road, in Bligham county, Idaho, one thousand and twenty miles from Omaha, the visitor will have no difficulty in procuring carriages, or, if he prefers it, in walking a mile or little more to the Soda springs. A little more than a mile north of the track is found the celebrated Hooper spring, bubbling and boiling in the midst of a cluster of more than a score of lesser springs, which occupy a space beside the waters of the clear, swift-running tributary of Bear river, into which, just a little ways below, it empties. This stream is filled with trout of the finest quality, and of itself is the fisherman's paradise. The party gathered about these waters, first in amazement, then in admiration, and presently each with goblet filled to the brim, was quaffing the foaming, crystal waters to the friends and loved ones at home. And surely no men ever drank deeper draughts of better and sweeter water than they did on Friday evening last.

The chemical elements of these waters are soda, iron, sulphur, arsenic, magnesium and carbonic acid gas in proper proportion to make them what they now are known to be—not only a delicious beverage, but one whose health and beauty giving properties entitle them to rank among the wonderful waters of the world.

They have proved a cure and restorative in numbers of instances where men, women and children suffered from all sorts of bilious and irregular liver troubles. They are invigorating to an extent that is simply marvelous; they are cleansing, purifying and appetizing, and their arsenic properties operate like magic on the complexion and good looks, as the roses that mantle the cheeks of the ladies of the vicinity give highest evidence of. They are remarkably palatable and pleasant to the taste; gently laxative in their effects, and can be drunk in copious quantities without any unpleasant consequences. Located in a gently inclining basin, whose surface is clothed in lovely green, surrounded by an almost perfect of beautiful hills whose snow-capped crests shone like silver in the evening sunlight; close beside a railroad station on a continental highway and in a most picturesque locality, the Soda springs possess a present that is wonderful to contemplate, and promises a future that will give them rank with the celebrated and popular watering places of the earth.

"Forward for supper," cried out the two captain-generals, and then began that

WILD, DUSKY RIDE, of which your last letter told, a ride that will make you less memorable the smoothness of this new track than the lightning speed of which the company's engines are capable. Mercy, how we did "kick the country" to catch the west-bound passenger train at Pocatello, where a sumptuous supper awaited the hungry party, to which they paid the omnium comens to the cook of nearly eating the landlord "out of house and home." That train was overtaken.

"AWAY FOR THE AMERICAN FALLS," rang out the conductor's voice on the gathering darkness, and again the train sped on to the crossing of Snake river.

"Look, you newspaper fellows, here are the falls," said an Omaha gentleman, and out upon the platform crowded the inmates of the "Meridian" and "Baggage" forgetting for the moment the merry chat of the several groups of gossipers to listen in unspoken awe to the roar of rushing waters.

The rap d train "slowed up" as the great roaring engine first set foot upon the bridge that spans the Snake, directly over American falls. It was an hour or more after twilight; the evening tongs of the yellow-breasted willow birds were drowned in the deep bass notes of the falling river; and as the long line of cars crept, as if in dread, over its slender iron pathway, the deep blue sky flicked with patches of the evening mist-cloud, oamed the light of its stars, that each eager eye might behold the rushing, tumbling, tangled waters as they broke in wild disorder from shore to shore in their ceaseless dashing. The moist breath of the mist was blown upon each watcher while the surging waters, crested with

creamy foam, gave a sigh of relief when all unharmed, they gathered their broken fragments to continue a long, winding journey to the great Utah lake of oysters.

Once over these falls, the Omaha party retired to sleep and dreams of beloved ones and long trout and soda springs, rushing streams and the pleasures of the morrow, and awoke at 6 on Saturday morning, side tracked at Shoshone City, twenty miles from the famous "Falls," of which you will be told hereafter.

As this sentence is written the train rolls into Huntington, the

POINT OF JUNCTION

of the Oregon Short Line and the Oregon Railway & Navigation company. It is a pretty little village, important because of being the connecting point of these two railroad routes, and pretty because, new and clean, it nestles upon a wide, green hill, set amidst broken and picturesque levels. D. C. R.

B. H. Douglass and Sons' Capsicum Cough Drops are manufactured by themselves and are the result of over forty years experience in compounding cough mixtures.

A GREAT INVENTION,

By Which the People Will Have But Little Use for Coal or Gasoline.

Yesterday evening a reporter for THE BEE saw in operation at the Omaha stove repair works, 111 North Fourteenth street, a great invention, which is destined to be an everlasting blessing to those who use coal or gasoline for fuel to do their cooking or heating.

The Bangs patent, the invention referred to, is manufactured by the National Heat and Light company, of Boston, and is a process by which one part of oil and three parts of water are decomposed and formed into a hydro-carbon gas for cooking and heating purposes. It can be used in all stoves and ranges, and is destined to be the fuel of the future, making a great saving in time, labor and money.

The stove, as seen at the Omaha Stove Repair Works, was a common cook stove, with the grate taken out and the attachment put in its place. Its simplicity and perfection are simply marvelous. The oil is let into the attachment by means of a valve, through which it is only possible for a certain amount of oil to pass and by which the amount of fire required is regulated.

The water is fed to the burner by an automatic valve. All the objectionable features of a stove are avoided. No kindling wood, no ashes, no dirt, and no odor or replenishing of fire. Turn the cock, apply a match, and your fire is made, and before you are lighting wood was formerly well lighted, your oven is ready to bake. For broiling it is far superior to coal, bakes in one-half the time, and it will do anything an oil stove or a coal stove will do, and has the advantage in the summer of not giving out any extra heat when not wanted, for as soon as you close the valve the stove begins to cool, where with coal it takes a much longer time. It is the greatest labor and money saving invention ever offered to woman. No invention of any age has been of such universal interest, and the most practical experts have unqualifiedly endorsed it, and predicted it would work a revolution in heating.

Everybody who has used one is enthusiastic in its praise. It appeals not only to the pocketbook, but to the taste for cleanliness and convenience. For cooking the work can be done more quickly and more satisfactorily than with coal or wood—so say the ladies who have used them, and for consideration would be glad to have the attachment taken out. An ordinary cooking stove can be run by this process at a cost of one-half to one percent per hour, according to the amount of fire required. The oven is heated quickly, and above all evenly. Danger is impossible, or even accident. The most timid lady can easily be convinced that it is a thousand times safer than a kerosene lamp, and that it is safer than even coal or wood.

M. W. A. Rahe, of New York city, and one of the firm, is in the city and has this great invention on exhibition at the Omaha Stove Repair Works, where he is making his headquarters at present. Those who would like to see it can do so by calling there this week. Mr. Rahe expects to have an agency established in this city in a few days for Douglas county, when the attachment will be placed on sale. He is now simply engaged in selling county and state rights.

If we are not mistaken coal bills this summer and next will be only a memory less than last year, and every one who sees the invention is perfectly taken with it.

See Dr. Pangle's card on the fifth page.

CHEYENNE REDDY.

The Crook who Calls Himself Pat Gibson, a Well-known Character—Sent Up.

Judge Stenberg put Pat Gibson through the mill yesterday, and sent him up in default of \$1,000 bail, to await the action of the grand jury at its next meeting. Pat Gibson is the man who was arrested last Monday evening for fleeing an unsuspecting and verdant country youth out of \$10.50 at the Union Pacific depot. He at first tried to get his victim cash a check of \$300 on the Omaha National bank, drawn by J. M. Skinner & Co. in favor of J. W. Howard. Previous to this racket, however, Gibson had hired the young man to herd cattle for him on a ranch out in the western part of the state, and represented that he hadn't enough money to pay his hotel bill. The victim turned over his pile, \$10.50, whereupon Gibson slipped away, shot up an alley and disappeared. In an hour afterwards he went back to the depot, supposing of course that the boy was gone, but in this he found himself mistaken. The confiding lad was there, saw his "friend," and stayed with him until they ran across an officer, and then both were arrested. This man Gibson is well known throughout the west as one of the most notorious toughs living.

His right name, and the one by which everybody knows him, is "Cheyenne Reddy." He was arrested at the state fair here last fall, along with several other soundrills of his stripe, for picking pockets. His chances now for a term in the penitentiary are very slim. He is held on the charge of attempting to pass a forged check.

Buy gasoline and oil from Omaha Oil Co. Cans furnished and delivered. Office 1406 Douglas st. A. M. Ketchen, Mgr.

CHEMICAL COMPOUNDERS.

Annual Meeting of the Nebraska Pharmaceutical Association.

Representatives Present from All Parts of the State—Mostly Informal Matters Yesterday—A Visit from the Iowa Brethren.

At 3 o'clock yesterday afternoon the Nebraska State Pharmaceutical association convened in annual session at Masonic hall, corner of Sixteenth street and Capitol avenue. The association will continue its meetings through two or three days, and in the meantime return a visit made to them yesterday by their Iowa brethren. The officers are:

Norman A. Kuhn, president.

H. H. Whittlesley, secretary.

C. M. Lighton, treasurer.

The meeting was called to order by Mr. Kuhn, and the secretary proceeded to read his annual report. It shows that the membership of the association at this time numbers 256 druggists, and of these fifty-one have added their names to the list during the past year.

The roll call yesterday was responded to by C. A. Goodman, James Forsyth, N. A. Kuhn, F. H. Groshel, A. M. Cajoni, Charles J. Dantaoh, C. C. Wild, M. Parr, George W. Parr, Carry Kittle, H. T. Clark, Oscar Greenhall, T. J. Smersh, Omaha, Neb.; F. A. Brainard, Omaha, Neb.; C. W. Kelly, Fremont, Neb.; W. A. Var, Bryon, Alma, Neb.; Will Oathway, Fullerton, Neb.; D. E. Weber, Arlington; T. C. Morgan, Hardy; W. A. Harding, Oakland; James Reed, Nebraska City; Hobart Brush, Ashland; M. E. Shultz, Beatrice; George H. Butler, Auburn; L. Kryger, Lyons; Frank P. Zimmer, Grand Island; A. C. Spandan, Grafton; M. G. Johnson, Oakland; A. J. Shepard, Kearney; H. E. Wells, Junata; George L. Allen, Dembar; R. R. Sherer, Red Cloud; Edward W. Baxten, Hastings; W. D. Haaser, Blair; J. N. Barker, Grand Island; M. W. Kjerson, Grand Island; E. K. McMichael, Ord; J. Adams, Tekamah; H. Cook, Red Cloud; R. L. Orr, Ponca; E. V. Ross, Dakota; E. L. Durr, Auburn; H. D. Bogden, Grand Island; Chas. Chinn, St. Paul; T. H. Davis, Fifth; William Widener, Lincoln; A. W. Atwood, Plattsmouth; G. A. Brown, North Bend.

A great many more were expected to arrive on the night train. The treasurer read his annual report and from that it is learned that the receipts of the association, since its last meeting were \$333.83 and expenditures \$138.14, leaving a balance on hand of \$195.69. This would indicate that the association is in a flourishing condition.

The following congratulatory message was offered, adopted and adopted to the Iowa association, which is in session at Council Bluffs:

The Nebraska State Pharmaceutical association sends greeting to the Iowa State Pharmaceutical association, and extend a cordial invitation to visit us in session at Masonic hall, Omaha.

N. A. KUHN, President.

GEORGE W. PARR, Ed. F. CHINN, Committee.

An hour or more was then devoted to a general of hand discussion of cocaine as an anesthetic, which is at present agitating the apothecary fraternity of the entire world.

The Iowa association, coming over from Council Bluffs in a body, was announced, received, and given seats in the hall. They were headed by their president, who occupied a chair on the platform with President Kuhn, of the Nebraska association. The visitors were:

J. W. C. Bryant, Cedar Falls, Ia.; A. D. Perry, Des Moines, Ia.; Norman Lichty, Des Moines, Ia.; W. T. Crawford, Des Moines, Ia.; C. A. Weaver, Des Moines, Ia.; John B. Webb, De Witt, Ia.; J. H. Hamper, Davenport, Ia.; S. G. Funk, Parfaria, Ia.; Russa M. Upton, Marshalltown, Ia.; C. R. Wallace, Independence, Ia.; F. E. Highton, Adair, Ia.; W. S. McBride, Marshalltown, Ia.; J. G. Stanley, Dexter, Ia.; A. V. Penn, Sidney; Henry Thornshorn, Boone, James D. Stuart, Mondakia, Fred Lax, Colo; W. J. Summerville, Odebolt, R. H. Lamonenk, Sac City; J. P. Morey, Storm Lake.

After speeches of welcome and responses thereon, the balance of the afternoon was given up wholly to social chat and becoming acquainted.

Mr. Robert J. Brown, Leavenworth, president of the Kansas association, is a visitor, and yesterday extended a warm invitation to the Nebraska association to visit their annual meeting, which will be held at Lawrence, beginning on June the 15th.

At 6 o'clock the meeting adjourned until 9:30 this morning, and the Iowa visitors returned to their own side of the river.

Every lady uses Pozzoni's medicated complexion powder. It is a household treasure. The madam finds it impossible to go down town without first rubbing it on. If the baby cries she goes for the puff box. If the "old man" comes home ruffled or chafed, because business is dull, etc., J. J. Pozzoni's powder cools and allays his troubles. Then all is gladness and joy. No family should be without it.

THE OLD TEMPLE.

The Last County Officer Has Moved to His New Quarters on the Hill.

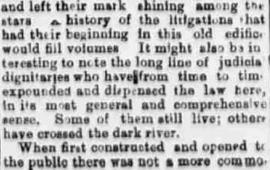

The old district court room received a parting farewell yesterday from the list of those who have heretofore been its official inheritants and gives way to much finer, grander, and more magnificent quarters, for the new building of justice. But to the old temple, while it stands, will cling memories of past events, identified with its history, that furnish food for an avalanche of thought. With its walls have rolled and echoed the touching eloquence of gentlemen richly endowed with nature's greatest gifts and deeply versed in the intricacies of legal lore and learning; men who have trod the hill-top of fame and left their mark shining among the stars—a history of the litigations that had their beginning in this old edifice would fill volumes. It might also be interesting to note the long line of judicial dignitaries who have in turn come to the old temple and dispensed the law here. In its most general and comprehensive sense. Some of them still live; others have crossed the dark river.

When first constructed and opened to the public there was not a more commodious or imposing court room to be found any place along the "Big Muddy." But civilization's progress and developments have made it possible for something better, therefore the old is discarded for a new structure, which stands without an equal in any western city. Mr. J. J. Pozzoni, clerk of the court, and his deputy have been very busy since yesterday morning, moving their docket, papers and records, and Mr. Crowell is just as busy getting the effects of the sheriff's office transferred. A slight hitch occurred up at the new building, but nothing of any particular moment.

The sheriff merely objected to taking the room assigned him because of its inconvenience to the court room, being on the floor below. This is remedied by allowing him to take what was first intended for a jury room, immediately over the north entrance and off from the court room.

The only creatures left with the old building now, to keep it company are those who get run in for violations of municipal regulation, the basement still being used by the city for jail purposes.

Self-Cure Free. A favorite prescription of a noted specialist. For Manhood, Debility, and Decay. DR. WARD & CO., LOUISIANA, MO.

Analyzing the Baking Powders

"Royal" the only absolutely pure baking powder made,---Action of the New York State Board of Health.

Under the direction of the New York State Board of Health, eighty-four different kinds of baking powders, embracing all the brands that could be found for sale in the State, were submitted to examination and analysis by Prof. C. F. CHANDLER, a member of the State Board and President of the New York City Board of Health, assisted by Prof. EDWARD G. LOVE, the well known late United States Government chemist.

The official report shows that a large number of powders examined were found to contain alum or lime; many of them to such an extent as to render them seriously objectionable for use in the preparation of human food.

Alum was found in twenty-nine samples. This drug is employed in baking powders to cheapen their cost. The presence of lime is attributed to the impure cream of tartar of commerce use in their manufacture. Such cream of tartar was also analyzed and found to contain lime and other impurities, in some samples to the extent of 93 per cent of their entire weight.

All the baking powders the market, with the single exception of "Royal," (not including the alum of phosphate powders, which were long since discarded as unsafe or inefficient by prudent housekeepers) are made from the impure cream of tartar of commerce, and consequently contain lime to a corresponding extent.

The only baking powder yet found by chemical analysis to be entirely free from lime and absolutely pure is the "Royal." This perfect purity results from the exclusive use of cream of tartar specially refined and prepared by patent processes of the N. Y. Tartar Co., which totally remove the tartrate of lime and other impurities. The cost of this chemically pure cream of tartar is much greater than any other, and on account of this greater cost is used in no baking powder but the "Royal."

Prof. LOVE, who made the analysis of baking powders for the New York State Board of Health, as well as for the Government, says of the purity and wholesomeness of "Royal:"

"I have tested a package of 'Royal Baking Powder' which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a great degree of merit and does not contain either alum or phosphates or any injurious substances."

E. G. LOVE, Ph. D.

*NOTE.—For full details of the official action of the New York State Board of Health on the subject of Baking Powders, see Annual Report of the Board, transmitted to the
